Description

The following datablocks were specified at the beginning of the project:
Argos Datablock to report on planned courses and student data for future semesters
Argos Datablock to report on students that had a course in their plan but didn't take it

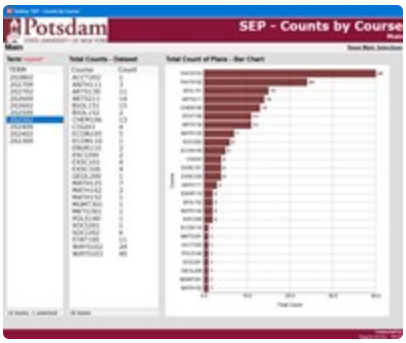
Brian Mead

Please forward along to everyone involved at Potsdam please!

Here is a ready version for SEP counts by course:



Please let me know if anybody has feedback before our next meeting, this is just a start to help you all visualize + count the total number of active plans with a particularly course, for a given term.

Hi Brian,

Please check out the comment string between Steph and myself from today (1/9/24). We will need to make sure that the Argos report picks up the credits needed for each of the requirements in case there are duplicates (CHEM 106 - 3 credits and CHEM 106 - 1 credit) within the same semester.

You may already be doing this, but I just wanted to be sure to note in.

Let us know if you have questions.
Thanks and have a great night.
Jen

Jennifer Allen

Hi Stef,

Giving Erik access in Controller would probably help! Sorry about that.
On the "Authorization" tab, I searched for Erik and used the pencil icon to bring up Erik's current access. Under "User Keys", I clicked the "Add Key" button and added the SEPPLAN key and saved. This should only allow Erik to view the plan. Let me know if this student should have additional access like the ability to create a plan, add a note, edit the plan, etc.

Thanks!
Jen

Stephanie Claxton

Hi Jen,
If I mark a discipline as inactive on STU352, would that hide them in the Planner?
Would that be a good way to resolve some of the clutter?

Sincerely,
Stef

Jennifer Allen

Hi Stef,

Unfortunately, no - the Inactive/Active flag in STU352 is only used in the Banner extract.
This "issue" will most likely take a few years to work its way out. Ellucian fixed a defect (more information in the below link).
"In the Courses list in the side panel of the planner, disciplines from STU352 which have no corresponding courses in the rad_course_mst no longer appear."

As long as students in Degree Works have those discipline code(s) on their records, they will show on the course list in Planner.

https://elluciansupport.service-now.com/customer_center?id=standard_ticket&table=ellucian_product_defect&sys_id=15ad3ed587d70d10fb8e43b6cebb355f

Danielle came up with a clever idea where we could rename the description of the discipline codes that you do not want in the list. Something starting the description with the letter Z and maybe add DO NOT USE at the end. Since the list is alphabetical, it will make it fall to the bottom in the Planner course list. You would need to refresh the browser to see the change. Maybe try one in DEV and see what you think?

Thanks.
Jen

William Dundon

Changed Percent Complete from "0 %" to "20 %".
Hi Stephanie,
Can you review the pdf I uploaded and let me know if this looks like what you needed for report1.
Thanks
Bill

Stephanie Claxton

Changed Status from "**Client Action Required**" to "**Work In Progress**".

Hi Bill,
Thank you for the sample report. I'm not sure that this report accomplishes what we're hoping for. Here were our original requests:
Student Educational Planner Report
• Argos Datablock to report on planned courses and student data for future semesters
o Report to be queried based on
 Degree, major, campus code, level, student status, student type, credit hours earned, student cohort code, student attribute code
o Report to include
 Count of students, course, course number, course attributes, term, major, degree, level, campus code, student status, student
 Ranked graph of planned courses for a given term
• Argos Datablock to report on students that had a course in their plan but didn't take it
o Report to be queried based on
 Degree, major, campus code, level, student status, student type, credit hours earned, student cohort code, student attribute code
o Report to include
 Count of students, course, course number, course attributes, term, major, degree, level, campus code, student status, student type

Some feedback:

- Needs to be Excel/CSV so that we can manipulate all of the fields mentioned above.

- The attributes in your sample are student level attributes, we need course level attributes not student attributes
- We need two reports- we need to be able to drill down to students but we are looking to accomplish seat projections at the course level

We are happy to meet if that's an easier next step. I do know that Brian had a start to what we were looking for in Argos (January) - do you have access that? It might actually be in this ticket (5149).

Sincerely,
Stef

Hi Stephanie,

I was just chatting with the SICAS team and it sounds like we may be able to get away without needing the database links set up.

Would someone at Potsdam be able to grant my user access to a DGW data connection in Argos? This is typically be the MAPS administrator granting access.

My username in MAPS/Argos at Potsdam is "meadba" and I current have access to Banner PROD and TEST, I just need DGW Prod and Test as well if possible. Thanks!

Danielle is running a process right now so we have cohort in DGW data behind the scenes, it would change anything in DGW unless someone purposefully scribes for it (as far as I understand it anyways!)

Thanks!

Aimee Swan

Hi Stef -

Brian is currently on Paternity leave - my apologies that you did not receive an update, I thought you were copied in the last note he sent to me - we do have resources here to work with you. Let me get some folks together and we can get on a call. Can you send me some times that you are available to meet next week?

Thank you!

Aimee

Brian Mead

Hi Stephanie,

I am getting ready to work on these datablock(s) and just wanted to ask for some specifics in the report request.

"The following datablocks were specified at the beginning of the project:
Argos Datablock to report on planned courses and student data for future semesters
Argos Datablock to report on students that had a course in their plan but didn't take it"

Report 1 - What datapoints would we like to report on for the "planned courses and student data for future semesters" ?
What parameters would we like to filter on? (term, student level, etc)

Report 2 - I believe this one sounds straight forward enough, but what data would you like to see for the students that had a course in their plan but didn't take it?

In short: What would you like in the datablock(s) for SEP reporting? Just pinning down the specifics so I can get started! Thanks!

Notified: Stephanie Claxton <claxtosc@potsdam.edu>

Tue 11/28/2023 7:48 AM

Stephanie Claxton

Changed Status from "**Client Action Required**" to "**Work In Progress**".

HI Brian,

For report 1

Filter on

Degree, major, campus code, level, student status, student type, credit hours earned, student cohort code, student attribute code

Datapoints to include

Count of students, course, course number, course attributes, term, major, degree, level, campus code, student status, student

Ranked graph of planned courses for a given term

For report 2

Filter on

Degree, major, campus code, level, student status, student type, credit hours earned, student cohort code, student attribute code

Datapoints to include

Count of students, course, course number, course attributes, term, major, degree, level, campus code, student status, student type

Sincerely,

Stef

Mon 12/11/2023 3:13 PM

Brian Mead

Hi Stephanie - what does Potsdam use for "cohort code" ?

Do you have an example of a student with a particular cohort code?

Fri 1/5/2024 8:06 AM

Stephanie Claxton

Hi Brian,
Cohort Codes and Attribute Codes– Banner SGASADD SGRCHRT_CHRT)CODE or SGRSATT_ATTS_CODE

Example P01160708 has both a cohort and an attribute

Sincerely,

Stef

Brian Mead

HI all,

I just sent out a meeting invite for 11am on Tuesday, Stephanie C and Stephanie A - does this work for you?

I just included everyone on this ticket - feel free to ignore if it's not super pertinent to you!

I just want to show what I have on the datablock so far and follow up with some questions about the datapoints.

Brian

Hi,
Can we pleases include Krista Medo (medokl@potsdam.edu) in this meeting?
Sorry Brian- I declined the invitation by mistake- it does look like we can all make it. Can you resend to me and include Krista?

Sincerely,

Stef
